EDUCATION

University of Georgia | Morehead Honors College Athens, GA
Bachelor of Science in Computer Systems Engineering December 2028
Bachelor of Science in Electrical & Electronics Engineering 3.97 GPA
Minor in Computer Science, Certificate in Cybersecurity & Privacy
Engineering Academic Boot Camp Scholar, NACME Scholar, NSLS Scholar, Zell Miller Scholarship Recipient

TECHNICAL SKILLS

Technology Concepts: Operating Systems, Linux/Unix, Networking, Machine Learning, Version Control, CAD, Simulation Design, Hardware Design, Radio Circuit Design, Pentesting

Programming Languages: Java, Python, C/C++, Julia, Matlab, Javascript, HTML/CSS, LaTeX

Languages: Fluency in English, Proficiency in Spanish

RELEVANT PROJECT EXPERIENCE

Automatic Weather IoT Device September 2025

- Developed and integrated networking capabilities and government weather APIs using C++ on an ESP32 microcontroller for real-time data acquisition
- Designed and implemented a custom graphics driver and touch interface for an SPI-based LCD screen, enhancing user interaction and display performance
- Fabricated precise CAD models in Autodesk Inventor for 3D printing and mechanical assembly, optimizing design for manufacturability and functionality

The SARS-COV-2 Pandemic Computer Generated Simulator August 2022 – February 2023

- Constructed a simulator with 98% accuracy designed to predict the deaths from SARS-COV-2 within local municipalities
- Consulted over 8 medical and research journals for the latest accurate information related to the spread and mortality rate of SARS-COV-2
- Formulated with key fundamental software concepts in mind, including Object Oriented Programming, modularity, and cross-compatibility in Python

RELEVANT WORK EXPERIENCE

University of Georgia College of Engineering Athens, GA
Engineering Academic Boot Camp Peer Mentor/Peer Leader June 2025 – Present

- Guided 14 incoming engineering freshmen through an intensive boot camp designed to build academic readiness, community, and confidence
- Facilitated workshops and study sessions on foundational engineering concepts and college success strategies
- Propelled team-building activities and group discussions to foster collaboration and a sense of belonging

ACTIVITIES AND INVOLVEMENT

The Hack Pack, UGA | Head of Embedded System Security Research August 2024 – Present

- Initiated research projects and community outreach efforts as Head of Embedded System Security in A.R.E.S Cybersecurity lab
- Acquired skills in pentesting, radio wave manipulation, satellite hacking, cryptography, blue team defense, etc.
- Awarded Most Improved Teammate with 2nd place finish at the 2025 NCAE Cyber Games Southeast

Dev Dogs, UGA | Algorithms Team Focus Lead June 2024 – Present

- Streamlined the management of over 30 team members and creation of internal documentation as the Algorithms Team Focus Lead
- Oversaw the integration of the Algorithms team into our full stack web application with third party APIs like CP-SAT and Jenetics in Java
